

FREDRICK MWENDWA

Full Stack Developer

Nairobi, Kenya | +254799250830 | fredrickmwendwa77@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFILE

Computer Science student with hands-on experience building and shipping web applications and REST APIs. Progressed from freelance frontend web development into PHP/Laravel business applications during a 3-month industrial attachment, then into backend engineering with Python, Django, Django REST Framework, and PostgreSQL, and has since added React to build complete, end-to-end web applications as a full-stack developer. Has independently built multiple production-style backend systems - including a multi-tenant inventory platform, an e-commerce API and a job board API - covering authentication, authorization, relational data modeling, and RESTful API design. Seeking a full-stack software engineering internship/ junior role to contribute to real-world projects and grow within a professional engineering team.

PROFESSIONAL EXPERIENCE

Industrial Attachment • ICT Authority

Sep 2025 – Dec 2025

- Learned and applied PHP, Laravel, and MySQL to build structured, database-backed business applications, marking the transition from static frontend work into full-stack development.
- Built a multi-entity Laravel application (Global Cargo Shipping) modeling clients, ships, crew, ports, cargo, and shipments, using resourceful controllers, validated Blade CRUD views, and Eloquent-backed data models.

Web Developer • Freelance

June 2025 – Present

- Designed and built public-facing websites (HTML, CSS, JavaScript) for real organizations, including We Got You Events and Shika Rada Initiative, covering services, portfolio, and contact pages.

PROJECTS

Inventra - Multi-Tenant Inventory & Sales Platform - <https://github.com/fredrickmwendwa/inventra>

- Engineered a multi-tenant Django backend organized into domain-oriented apps (accounts, inventory, sales, suppliers, tenants, dashboard) to model a real inventory and sales workflow.
- Implemented tenant onboarding, authentication, and access control alongside inventory, stock-movement, and supplier management features.
- Structured relational data models in PostgreSQL and used environment-based configuration (python-decouple) to separate settings from code.

Stack: Python, Django, Django REST Framework, PostgreSQL

E-Commerce API - REST API for Online Retail - <https://github.com/fredrickmwendwa/ecommerce-api>

- Built a Django REST API with token authentication, product search and pagination, admin-only product/order-status management, and order history.
- Implemented cart and checkout logic with stock validation using database transactions to keep order and inventory data consistent.

Stack: Python, Django, Django REST Framework, PostgreSQL

Job Board API - Role-Aware Recruitment Platform - <https://github.com/fredrickmwendwa/job-board-api>

- Designed a role-aware REST API with separate job seeker and company authentication, ownership-based permissions, and application-tracking workflows (pending, reviewed, shortlisted, rejected).
- Implemented resume-upload handling plus keyword, location, and job-type filtering with pagination for efficient job search.

Stack: Python, Django, Django REST Framework, PostgreSQL

SKILLS

Languages: Python, SQL, JavaScript, HTML, CSS

Frontend: React, JavaScript (ES6+), responsive UI development, HTML5, CSS3

Backend: Django, Django REST Framework, REST API design, JWT authentication, session-based authentication, MVT architecture

Databases: PostgreSQL, relational schema design

Tools & Foundations: Git & GitHub, Postman, environment-based configuration

EDUCATION

Diploma in Computer Science - Kiambu National Polytechnic

Coursework completed | Expected graduation: February 2027
